DETAILED ACTION

Claim Objections

1. Claims 3 and 6 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites the limitation "the low angle face gear" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Yokel USP 3,803,934.

Yokel discloses:

Application/Control Number: 10/715,697

Art Unit: 3682

a drum (see thin portion of gear 44 between shaft and teeth) having an inner cylindrical wall (see portion of gear 44 immediately adjacent shaft) adapted to be mounted on the shaft, an outer cylindrical wall (see root circle of gear 44), and a drum face (see face of drum facing in axial directions) connected to said inner cylindrical wall (see gear 44 in figure 1);

Page 3

- a gear ring (see thicker portion of gear 44 between teeth and drum portion) mounted on and fixed to an outer circumference of the drum face;
 and gear teeth (see meshing teeth on outer circumference of gear 44)
 formed on an outer circumference of the gear ring,
- wherein a vector normal to the gear teeth at a radial and a vector perpendicular to the inner cylindrical wall at the radial have an angular difference that is less than 30° (C3/L10-20)
- a power generation system including an engine (C2/L14-15);
- a shaft (10) coupled to the engine; and
- a spur gear (18) mounted to the shaft;
- a receiving system (see transmission in abstract) including: a shaft (40);
- a low angle face gear (44) mounted to the shaft of the receiving system,
- wherein the power generation system shaft (10) and the receiving system shaft (40) are positioned such that the shafts have an angular difference that is less than 30° (C3/L10-20).
- wherein the receiving system is a transmission (see abstract).

Application/Control Number: 10/715,697 Page 4

Art Unit: 3682

 wherein the transmission includes a rotary engine transmission (internal combustion engine is a rotary engine).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Terence Boes whose telephone number is (571) 272-4898. The examiner can normally be reached on Monday - Friday 9:00 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Ridley can be reached on (571) 272-6917. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
